JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

May 20, 1904 1004

will probably sail this month. There are no others now in port, and unless this year is an exception, of which there is no indication, there will be about 2 ships a month for the medical officer to look after at this port for the next 6 months. Jute forms the largest part of all the cargoes, and the crop for last year is now nearly disposed of, while that for this year is not yet grown.

ITALY.

Report from Naples—Inspection of vessels—International Marine Congress—Smallpox in southern Italy.

Passed Assistant Surgeon Eager reports, April 25, as follows: During the week ended April 23, 1904, the following ships were inspected at Naples and Palermo:

NAPLES.

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of large bag- gage in- spected and passed.	Pieces of baggage disin- fected.	Number of steerage passengers recom- mended for rejection.

International Marine Congress.

The fourth congress of the International Marine Association will be held at Lisbon from May 22 to May 28, 1904. In addition to topics to be discussed under the general head of oceanography and hydrography, measures will be considered for the unification of all matters connected with the treatment of vessels in ports, presumably including quarantine. In the programme a separate heading is given to the improvement of ports by the installation of practical appliances for the treatment of vessels. Sailors' charitable associations, the Panama Canal, wireless telegraphy, fisheries, territorial seas, international marine statistics, North Atlantic weather forecasts, and yachting are among the subjects to be discussed.

Smallpox in southern Italy.

Owing to the large emigration from all parts of southern Italy of persons who are brought in close contact with each other at Naples prior to embarkment, and in view of unofficial reports from various sources of the occurrence of smallpox at different points in the region
